Alumnus – Decentralized Credentials
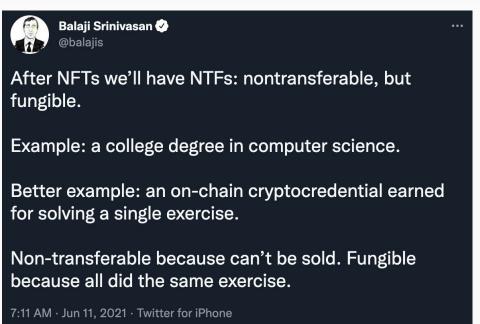

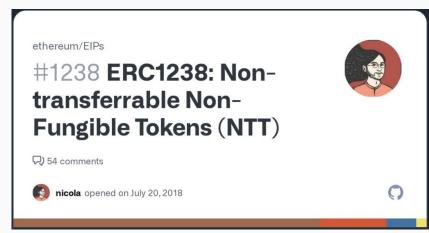

jyotirmai.eth

Motivation

- Balaji: "What if Elon could recruit astrophysicists and engineers from his Twitter followers?"
- Need a way to (pseudonymously) prove ability – unlock talent & opportunity to anyone with an internet connection
- **Solution: cryptocredentials**

Alumnus

- Our app tries to tackle this problem.
- In exchange for passing an online test, you earn a cryptocredential
- Unlike NFTs, this cryptocredential is **Non Transferable** but **Fungible.**

Non Transferable Fungible Tokens

Balaji Srinivasan ✔
@balajis
...

After NFTs we'll have NTFs: nontransferable, but fungible.

Example: a college degree in computer science.

Better example: an on-chain cryptocredential earned for solving a single exercise.

Non-transferable because can't be sold. Fungible because all did the same exercise.

Beta Test!

- We've made a test based on the material Balaji lectured about, and we'd like you to take it.
- Link to app: **https://app.alumnus.network/**
- Make an account and connect solana wallet (https://phantom.app/)
- If you pass: cryptocredential and link to a discord server.
- Beta test so credential is on devnet → No gas fees!
- **FEEDBACK FORM:** https://qpdsmd8fy21.typeform.com/to/yAYCuMBw
